- mohitkr803101@gmail.com
- MMDU Haryana - 133207

SKILLS

- Pythn, C++, C, MySql
- Pandas, NumPy, Matplotlib,
- Data Visualization, Statical Analysis
- Git, Github, Postman, VS Code
- Power BI, Tableau, StreamLit

EDUCATION

- 2024 - 2026**
MAHARISHI MARKANDESHWAR
UNIVERSITY MULLANA HARYANA
Master of Computer Application
- 2021 - 2024**
PATLIPUTRA UNIVERSITY PATNA
Bachelor of Computer Application
- 2019 - 2021**
BSEB PATNA
Intermediate (Mathematics)

CERTIFICATION

- Python, SQL, Data Analytics

Data Analytics Enthusiast currently pursuing MCA. Skilled in Python, SQL, Power BI, and AI models, with a strong foundation in Statistics and Math. Focused on crafting insightful visuals and building automated data pipelines. Eager to contribute analytical expertise and problem-solving skills to real-time, insight-driven projects.

PORTFOLIO URL

MOHIT KUMAR

Aspiring Data Analyst

INTERN | JULY - AUG 2025

Xplore (MMICTBM)

AI-based Data Analytics training program through college. Worked with Python, Pandas, NumPy, and Excel for data analysis and preprocessing. Learned data cleaning, visualization, dashboard creation, and report generation techniques. Performed exploratory data analysis (EDA) to identify trends, patterns, and insights from datasets. Gained practical exposure to AI-assisted analytics, business reporting, and decision-making concepts.

PROJECT

- AI-BASED DATA ANALYTICS PLATFORM | 2026 - FEB**
 - Developed a data analytics platform using Python and Streamlit for data visualization, prediction, and intelligent insights.
 - Implemented machine learning models and interactive dashboards for analyzing CSV datasets.
 - Used Pandas, Matplotlib, Seaborn, and Scikit-learn for preprocessing, visualization, and predictive analysis.
- HOTEL BOOKING CANCELLATION ANALYSIS | 2025 - JULY**
 - Python, Pandas, Power BI ,Analyzed booking data to identify cancellation patterns and trends Created interactive dashboards for revenue insights Performed data cleaning and preprocessing using Python Pandas.
- DIGITAL DOOR LOCK SYSTEM | FEB TO MARCH 2025**
 - Improved a smart digital door lock system with OTP-based access control. Integrated OTP authentication, ensuring that only authorized users can access the door. Executed OTP generation and verification. Applied automatic door unlocking mechanism upon OTP verification, enhancing security. Utilized Arduino and GSM900A module for hardware interfacing, enabling online OTP verification and automatic locking.
